

# TODA Longlife Coolant

## Product Descriptions

TODA Longlife Coolant is a Ethylene glycol, Anti-Freeze Anti-Boil as used in initial manufacturer factory fills. It uses a technically advanced OAT (Organic Acid Technology) based inhibitor system that is Phosphate, Nitrite and other free. TODA Longlife Coolant formulation prevents rust, corrosion, cavitation and degradation of the cooling system.

## Quality Attributes

- Provides long lasting radiator protection for at least 5 years or 160,000 km.
- Can be used for both gasoline and diesel engines.
- Provides all types of engine protection. The parts are made of aluminium as well.
- Do not damage the seals, pipes and other components made of plastic.

## Applications

- TODA Longlife Coolant is a concentration formulation and is ready to use directly from the container. It and can be poured directly into the cooling system. No further dilution is required. It can be used as a complete service refill, top up and safe to mix with other coolant.
- TODA Longlife Coolant recommend for maximum performance and longevity of the coolant and protection of the cooling system do not mix water.

## Typicals

Colour	Blue
Density @15 °C, kg/l	1.11
Freezing Point °C	-38
Boiling Point °C	>160

## Packing Size 1 liter, 5 liters

The data mentioned in this product information sheet is meant to enable the reader to orientate himself about the properties and possible applications of our products. Although this overview is composed with all possible care on the stated date, the compiler does not accept any liability for damages caused by incompleteness and/or inaccuracies in this information, especially when these are caused by obvious typing errors. The terms of delivery of the supplier apply to all product supplies. The reader is advised, especially for critical applications, to make the final product choice in consultation with the supplier. Due to continual product research and development, the information contained herein is subject to changes without notification.
